BEACON

Industrial Services, LLC

Specializing in complete industrial
cleaning for manufacturing and process facilities.

The Need for Clean

Experience

We have more than 20 years of experience in providing critical cleaning services that have set the highest standards in restoring optimal performance to manufacturing and process equipment. This includes: breakdowns, release compliance and environmental health and safety issues, as well as equipment that may not have been regularly and properly maintained.

Green Cleaning with Power

Using **ARMEX**[®], the industry's leading baking soda-based abrasive technology and other products, we can easily remove carbon, grease, oils, surface corrosion, paint and coatings from a variety of alloys, metals, plastics and composites without causing substrate damage or discoloration. This technology even leaves hard-anodized coatings in tact.

EPA and OSHA approved

The Beacon Difference

- ◆ **Evaluate:** schedule an initial visit by the Beacon team of experts who will evaluate the scope of the project.
- ◆ **Plan:** based on that evaluation, we'll develop an Action Plan which is a custom solution for your facility and equipment, whether for performance or preventive maintenance or for the cleaning of failed production systems.
- ◆ **Act:** Assign and deploy an expert cleaning crew who understands the scope of work to be performed, the schedule, and the importance of the highest quality results required to restore optimal performance efficiency.

Experienced, specialized cleaning of mechanical systems and facilities for industrial plants and manufacturers.

Critical & Preventive Maintenance Cleaning Services

We strongly believe that Preventive Maintenance, when scheduled and conducted by our experienced team, will minimize downtime and greatly decrease the occurrence of mechanical failure. We develop a detailed Action Plan for cleaning of the following:

- ◆ Dust collectors
- ◆ Industrial exhaust
- ◆ Central Vac systems
- ◆ Ribbon blenders
- ◆ Transfer line
- ◆ Heat exchangers
- ◆ Spill containments
- ◆ Process ductwork
- ◆ Industrial ovens
- ◆ Process equipment
- ◆ Storage tanks
- ◆ Cooling towers
- ◆ Fume hoods
- ◆ Silos
- ◆ Air-handlers
- ◆ HVAC
- ◆ Unit heaters
- ◆ Vats
- ◆ Bag Houses
- ◆ Air scrubbers
- ◆ Lab Hoods
- ◆ Tanks
- ◆ Hoppers
- ◆ Vessels

...plus, facility structure and infrastructure, including ceilings, overheads, pipes, conduit, lights and other hard-to-reach areas, and the exteriors of ductwork and machinery.

ACON Difference

The Beacon Difference is our Action Plan

From the very beginning of working with you, we develop an Action Plan customized specifically for the scope of work related to your project. We take into accounts all facets of your operation to make sure that we provide the cleaning services required to get you back up and running at optimal efficiency as soon as possible.

This Action Plan includes:

- ◆ A Timeline for Cleaning
- ◆ Detailed services to be provided for each project
- ◆ Identity of Key Team members with their specific responsibilities and contact information
- ◆ Detailed costs and terms
- ◆ A Final Report for all services performed

Call today – 888-671-3939

See what The Beacon Difference can do for you.

Please call us and we will discuss with you how we will provide the cleaning services you need with the shortest downtime possible.

For “can’t wait” service, call us toll-free at **888-671-3939** or email us at **info@beaconindustrialservices.com** – we are always available and ready to help!

Especially for manufacturing and process plants who need to maintain optimal efficiency/production/operation, Beacon Industrial Services specializes in complete cleaning and preventive maintenance services for manufacturing process equipment, mechanical systems, and plant facilities by providing a customized Action Plan that minimizes downtime.
